buy products with
too much packaging

17

We _____
buy products if
animals were killed
to make them.

18

We _____
do things
manually.

4. Read the text and answer the questions.

POLLUTION

In recent years, pollution has become one of the most serious problems we face in modern day life. The rapid development in science, technology and industry have all contributed to this problem. On the other hand, deforestation is another concern as the lack of trees can intensify this problem because trees provide oxygen, which is fundamental for animal life. Air pollution is a result of cars exhaust pumping carbon monoxide that poisons the air. The discharge from factories causes much the air pollution. However, radiation from nuclear weapon tests is an invisible form of air pollution. Radioactive dust is invisible but deadly to all living beings. To solve this problem we should consider using lead-free petrol in cars and keep badly maintained vehicles off the roads. There should be strict control on factories and issue heavy fines for offenders. It would be beneficial to move harmful industries outside city boundaries. On the other hand, Water pollution happens when water supplies are contaminated by

waste from factories. Factory waste leaks into the rivers and kills millions of fish. Artificial fertilizers and pesticides flow into rivers and poison the water. Modern farming methods are responsible for much of the water pollution. The sea is polluted by oil, chemicals and other radioactive waste. To overcome this problem it should be illegal to dispose waste into the sea and a lot of consideration should be made to develop a water purification system. While, farmers should use safer fertilizers and pesticides on their farms. It is up to us to stop damaging the environment. We all should be environment friendly.

QUESTIONS

1. What has caused pollution recently? _____
2. What provides oxygen? _____
3. Which is an invisible kind of pollution? _____
4. How can we solve air pollution? _____
5. What contaminates water? _____
6. How can we solve water pollution? _____
7. What does the deforestation cause? _____
8. Why do you think we should all be environment friendly? _____

5. Complete the sentences with **Should / Shouldn't** conforming to save the earth.

SHOULD

SHOULDN'T
